

Endpoint registration securely enables SIP/H.323 video room systems and video SIP clients to join a video meeting entering only the VMR#/ Conference ID.

Example: 005831407223

Non-registered systems may still join a video meeting but will need to enter a URL address.

Example SIP URL: [005831407223@38.147.118.100](tel:005831407223@38.147.118.100)

Example H.323 URL: [38.147.118.100##005831407223](tel:38.147.118.100##005831407223)

If you would like to register video endpoints, then please provide their configuration in the table below to pair with the PTC Video Service.

The video server gateway is: video01.ptcvideo.com

| Number | Device Model | Device Name | Sign In Address | Password |
|--------|--------------|-------------|-----------------|----------|
| 1 | | | | |
| 2 | | | | |
| 3 | | | | |
| 4 | | | | |
